GRAPPLE BARS from Dragon CRS-2 Instruction Manual

This document was made possible after reviewing recent material about the hardware from Dragon CRS-2 mission, the Grapple Fixture Bars 1 and 2. The original pdf file of the Dragon CRS-2 trunk payloads has been updated showing the new Grapple Bars. This manual shows the location where these Bars will be glued on the ISS truss of the AXM ISS model.

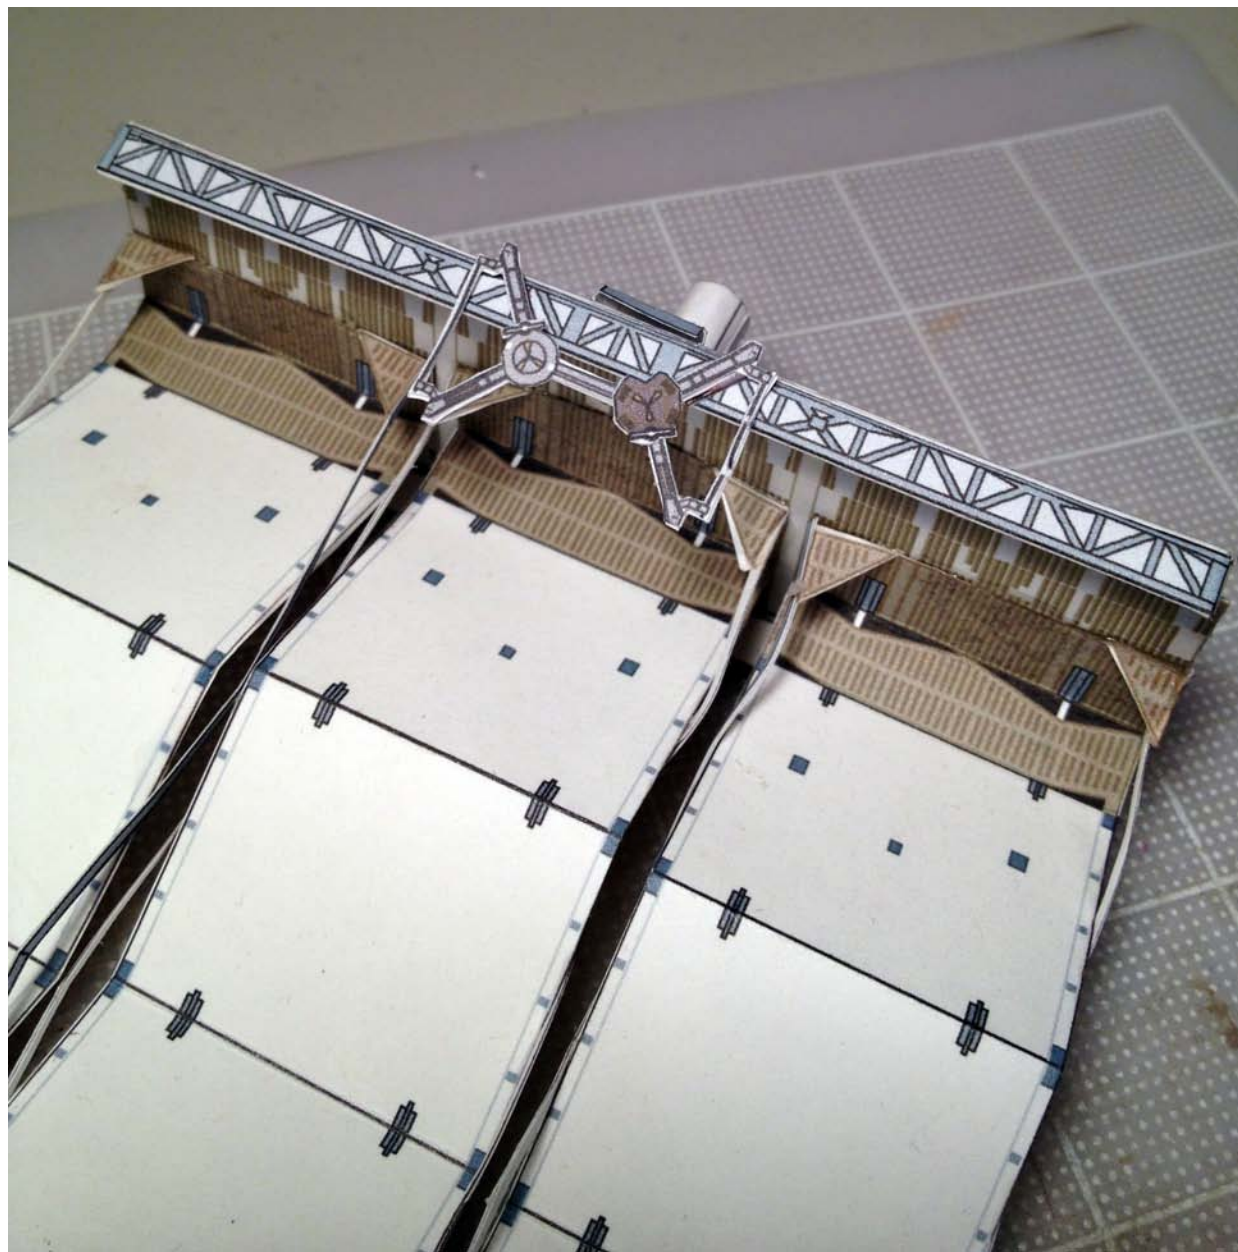

Glue these small parts on both S1 and P1 Radiator Beams and then glue the Grapple Bars on top.

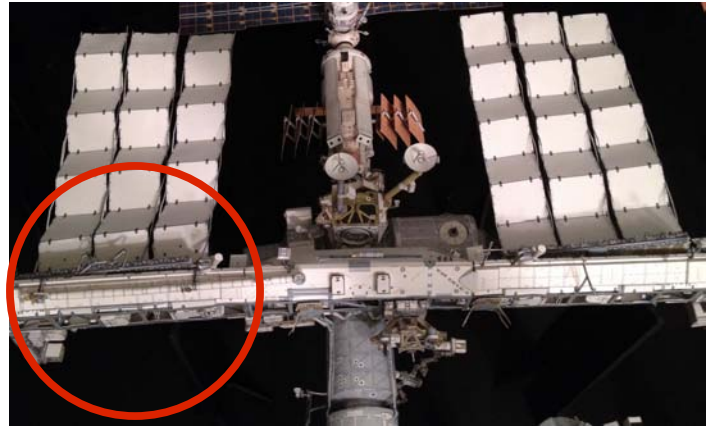

Grapple Bar 1 on S1 truss Radiator beam

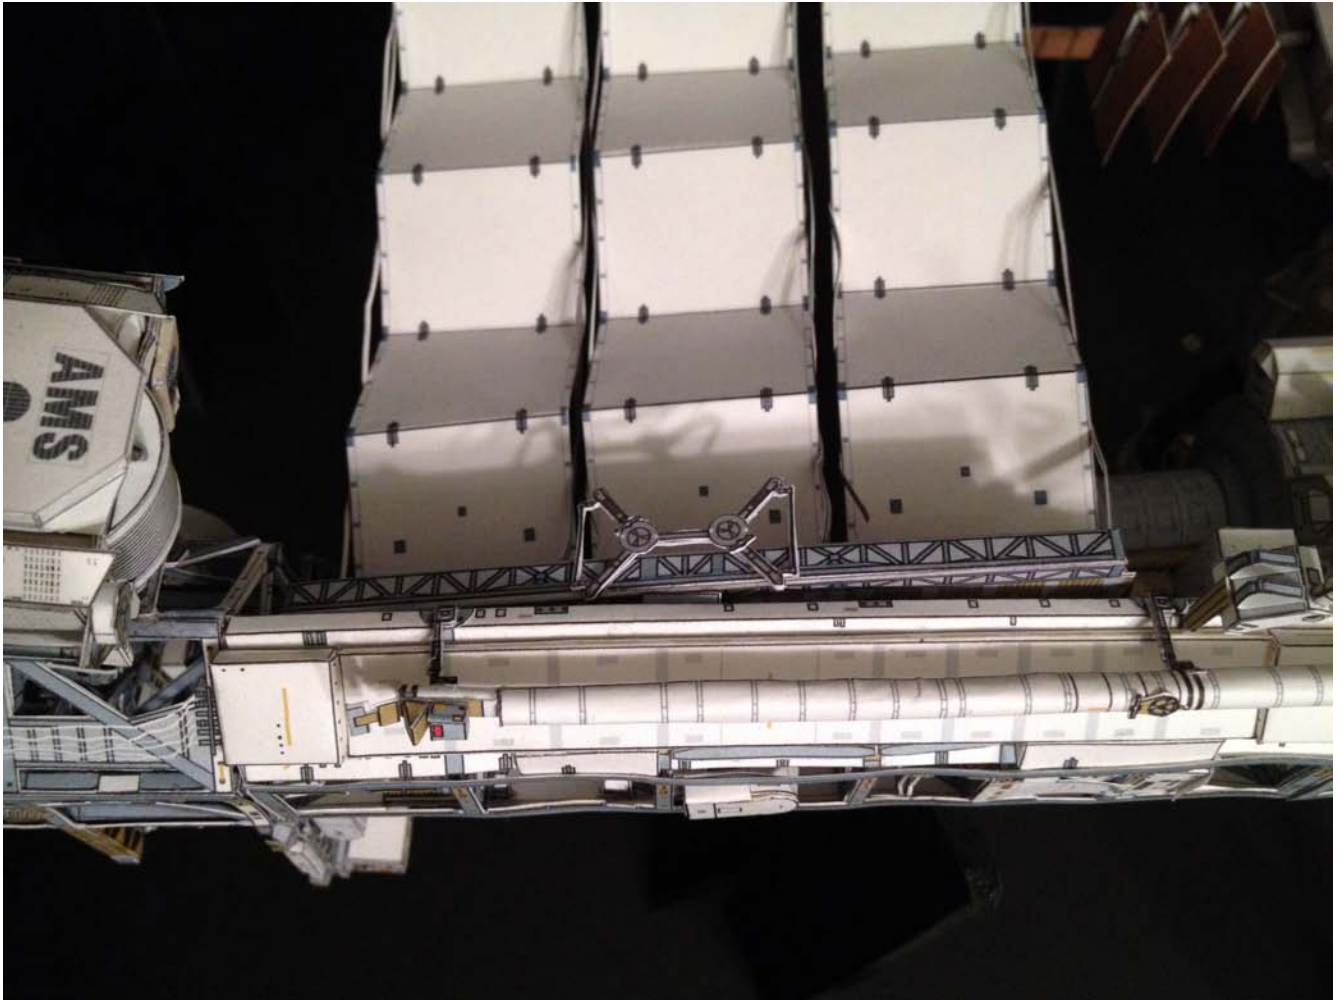

Grapple Bar 2 on P1 truss Radiator beam

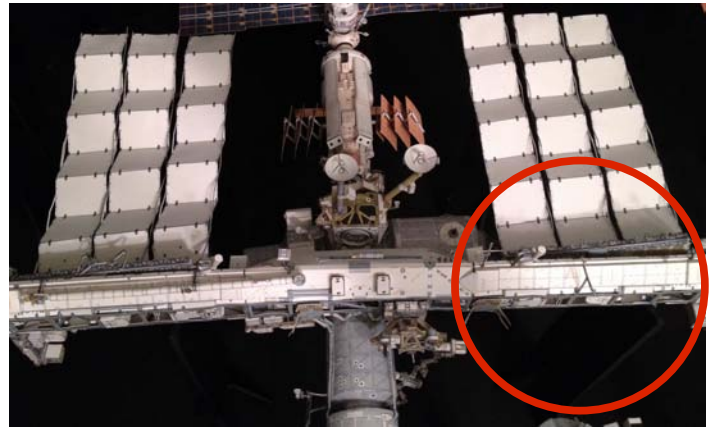

Where?

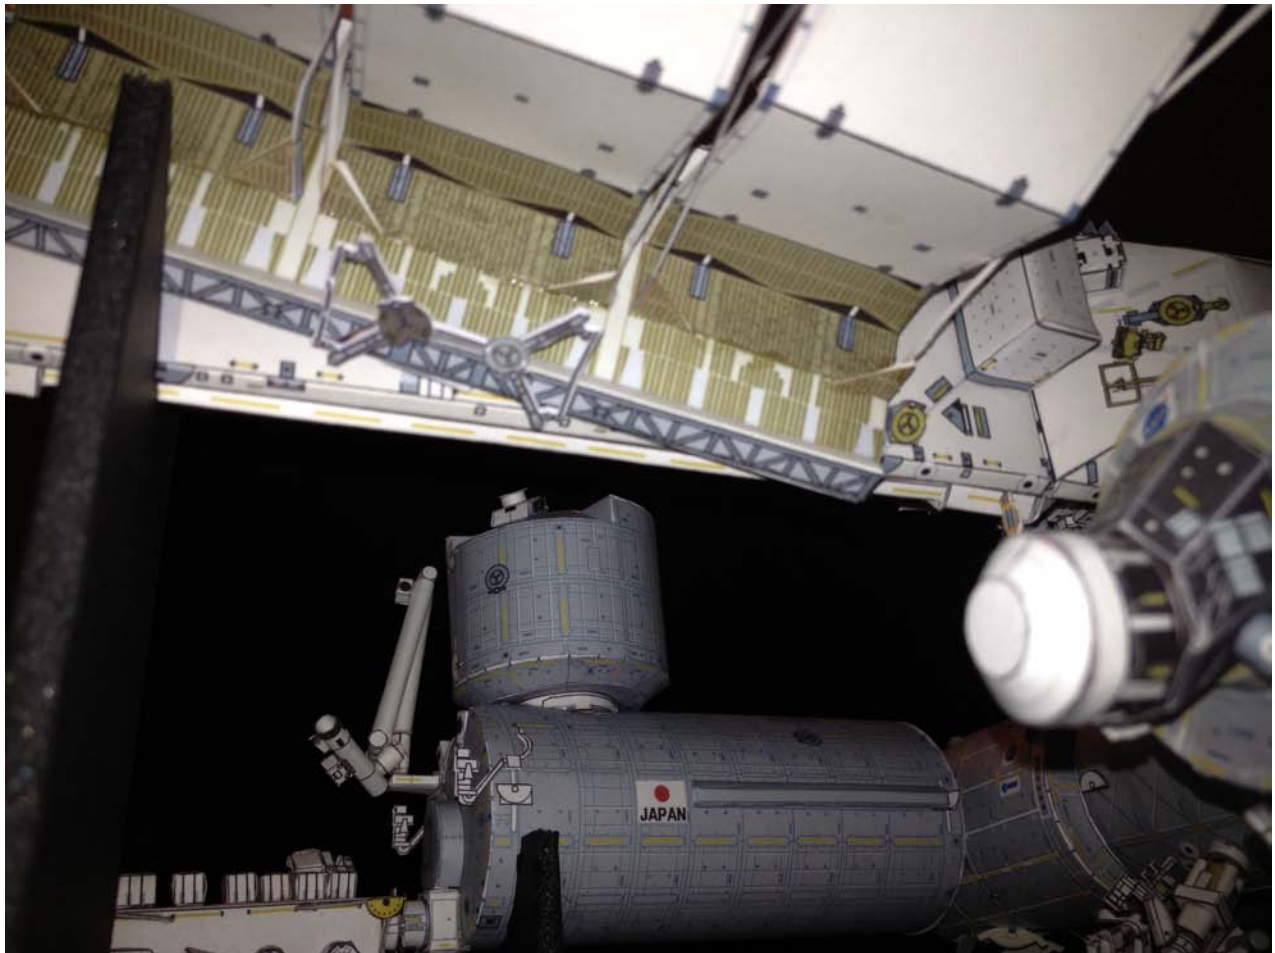

Grapple Bar 1 on S1 Truss Radiator Beam

Grapple Bar 1 faces upwards.

Grapple Bar 2 on P1 Truss Radiator Beam

Note that the Grapple Bar 2 is facing downwards, opposite as the Grapple Bar 1.
